

LOGISTICS WITH SUSTAINABLE ISGUS SOLUTIONS

International logistics service provider appreciates flexibility

Honda Logistics UK Ltd., a key player in the warehousing and logistics industry for 25 years, primarily supports Honda of the UK Manufacturing Limited (HUM) and other Honda Motors manufacturing plants worldwide. They also offer services to businesses of all sizes and sectors. In early 2018, they needed to replace their outdated Time and Attendance system and chose ISGUS UK Ltd. for their ZEUS® application due to its high customization options. The decision was influenced by the fact that many providers only offered rigid solutions with limited flexibility.

Our ZEUS® solutions convince with simple operation

The ZEUS® system proved to be highly adaptable and user-friendly, especially during the challenges of COVID-19 when staff had to be furloughed. Overall, Honda Logistics UK Ltd. is excited about the benefits and efficiency that the new system brings to their operations. HLUK had a positive experience with ISGUS' ZEUS® system, which supports virtual architecture like VMware and Nutanix SAAS clusters. This was a major bonus for HLUK as it allowed for easy software upgrades, security testing, and pen testing. The project implementation was straightforward and managed well, with the ISGUS team providing quick solutions and suggesting more efficient ways of operating. The installation process was quick, clean, and professional, covering multiple locations and complex access control. Overall, HLUK is excited about the benefits and ease of use provided by the ISGUS system.

ward and managed well, with the ISGUS team providing quick solutions and suggesting more efficient ways of operating. The installation process was quick, clean, and professional, covering multiple locations and complex access control. Overall, HLUK is excited about the benefits and ease of use provided by the ISGUS system.

Simple and fast adaptability is important at ISGUS

The ability to customize time recording terminals has been a game-changer for Honda Logistics UK, as it allows them to use their current clocking cards with multiple RFID chips for various purposes. This customization feature, along with prompt and comprehensive support services from the provider, has saved them time and money. Gary praises the ZEUS® platform for its efficiency and user-friendly interface, making it a perfect fit for their fast-paced environment. Overall, Honda Logistics UK is thrilled with the seamless integration of ZEUS® into their complex infrastructure, highlighting the platform's cutting-edge capabilities.

CHALLENGE

HLUK not only works with standard shift systems but also has over 200 working time rules. A key decision criterion in favour of ISGUS was that many of the potential providers usually only offer a turnkey solution with very little room for customisation and future system expansion.

INDUSTRY

Logistics
International company with headquarter in Swindon (UK)
Approx. 1200 employees

SOLUTION

Successful implementation of the ZEUS® Time and Attendance, mobile App, Access Control and Roll Call App software solutions. Terminals such as the IT 8200 FP and the IT 4100 were also installed.

“In general, the whole experience from planning to implementation and finally the aftercare was a pleasurable experience compared to other projects over the years.”

Gary Stewart (Head of IT), Honda Logistics
